

Vigo Universal, based in Namur, is specialized in new technologies such as 3D scanning and printing, virtual and augmented reality, gesture recognition... The company is built around four axes:

- Vigo Design: innovative communication agency, organisation of conferences and seminars...
- Vigo Event: dedicated to create events such as team buildings, fire shows, medieval reconstitution...
- Vigo IT: virtual reality, augmented reality, gesture recognition and serious game.
- Vigo Replica: dedicated to 3D scanning and 3D printing. These four axes allow the development of projects, from the simplest to the more extravagant ones. Our strength is our versatility: all our technologies can be combined with each other in order to create custom design projects according to your needs. Our mission is to democratize with passion the access to new digital technologies. In this way, the sole limit is your imagination!
