

ATIS-Network is aimed at companies and organizations' collaborators from small working groups to big structures. In an adjustable and upgradeable way, the ATIS-Network platform gives the professional and associative world the opportunity to create ecosystems which are perfectly adapted to their jobs and challenges. Therefore, their communication, organization and knowledge sharing will become easier.

Thanks to ATIS-Network interconnection ecosystem, the organization can meet its collaborative needs (Intranet), include all the external stakeholders (extranet), and use the new opportunities with all the actors on the platform.

With this in mind, ATIS-Network is also aimed at self-employed experts who would like to join the entire ecosystem.
