

In the Audiovisual industry, NTTRB (Never Touch The Red Button) helps companies to communicate digitally. From script to screen, NTTRB produces innovative and didactic contents, especially in the engineering industry.

Expert since 15 years in holographic system, we also bring the Waouw effect on stage for the event industry.

To go further in the collaboration process, NTTRB developed virtual online post-production workstations accessible from everywhere and based on a completely scalable pay per use technology. Your studio is here, in the cloud !!
