

DELTACAST

DELTACAST is a pioneer provider in the world of live TV production. DELTACAST develops a set of high-technology graphics solutions mainly for professional broadcasters. The DELTA-sport suite is used in many sports events around the world. Furthermore, DELTACAST has launched a product range that you may discover in arenas, shopping malls or conference rooms.

DELTA-live is a system that enhances virtual graphics in live on soccer or rugby pitch. The watcher can benefit from heat maps, fault location map, penalty history, shot speed, and so on.

DELTA-branding, like DELTA-live, makes feasible the live insert of advertisements or logos (2D or 3D) on the pitch or on the tribune.

DELTA-offside is a precision tool built for referees inside the VAR. They are able to draw virtual offside lines on the pitch in order to validate their judgment.

DELTA-highlight concretely illustrates on the field, in all kind of sports, the purpose held by a journalist or a consultant during a deep analysis at half-time or after the final whistle. 70 more objects are available in the library. An additional module called **Virtual View** recreates real sequences into 3D mode.

DELTA-touch is a telestration tool. Generally used by presenters to directly interact during the show with a tablet or a touch screen.

DELTA-stat is an intuitive software that masters set of graphics on TV like statistics, line-up, substitution and so on.

DELTA-stadium is a tool dedicated to visual animation of screens in arenas (countdown, players' entrance, clapping, statistics, weather conditions, etc.).

DELTA-cg is an advanced character generator divided into two different parts. The first one is the play out. Its mission is to control your graphics,
