

Technocité, our approach makes the difference:

A specific management of knowledge in the field of ICT and digital media concentrated on anticipating technological changes and increasing partnerships in enterprise and research areas.

Advanced equipment and a team of more than 80 great experts partners coming from working life.

Cooperations and partnerships with enterprises, research institutes, education and cultural institutions.

More than 300 training modules which can meet your expectations in the fields of :

1. Digital media & audiovisual professions
2. CAO and Digital Image Synthesis
3. Web technologies & social networks
4. Mobile development
5. Serious game
6. ICT networks
7. Technical offices & business solutions

Our objective: educate and support our region in technological progress.

Based on his expertise in the field of knowledge management, Technocité aims at improving technological at a regional level ; through enterprises, authorities, and schools by discovering new working methods and modern tools in our economic era.
